I pay for XM Radio for a reason!!! I am an over-the-road trucker and I rely upon XM's weather and traffic information 24/7, all across the U.S. XM provides quality and variety in listening and I can hold a station from the state of Washington through to Miami, FL. If the NAB can't compete, that's their problem, and it doesn't seem reasonable that because they cannot compete, they should attack those who can provide!

I respectfully urge the FCC to reject NAB's Petition 04-160, and that it support XM's ability to provide the programming that I demand, deserve and pay for with my VERY hard-earned dollars!!!!!!
